WASHED & CALCIUM-BUFFERED

India Export Grade

From Coconut Groves to Global Markets

A specialized manufacturer and exporter of washed and calcium-buffered cocopeat, rooted in the rich agricultural landscape of Karnataka — serving professional growers and importers worldwide.

OUR STORY

A Legacy of Quality, a Commitment to Sustainability

Peatman Coco Products Pvt. Ltd. was founded with a clear purpose: to craft premium natural, organic growing media from the abundant coconut husks of Karnataka for the international market.

Based at Sy No. 266/3, Holalagunda Village, Kunigal Taluk — at the heart of India's coconut belt — our facility processes thousands of metric tons of raw coir pith annually. Proximity to source ensures year-round availability and an environmentally responsible supply chain.

Scientific processing, multi-stage washing and precise calcium buffering ensure consistently low EC, stable pH and excellent structure in every batch.

OUR MISSION

To supply professional growers worldwide with consistent, scientifically processed cocopeat — enabling productive agriculture while crafting organic growing media from coconut husk.

OUR VISION

To become India's most trusted name in buffered cocopeat exports, known for uncompromising quality standards, scientific processing and customer-first service.

OUR VALUES

Sustainability at the core. Consistency in every batch. Full transparency with COA for every shipment. Long-term partnerships built on reliable quality.

KEY ATTRIBUTES

Lab Tested · COA

EC < 0.2 mS/cm

Superior Water Retention

100% Sustainable

Custom Packing

Private Labeling

Karnataka, India

Engineered for Professional Growers

Buffered cocopeat blocks and low EC substrates — processed to international standards for demanding horticultural applications. Every batch lab-tested with Certificate of Analysis.

4.5-5.5 KG COMPRESSED BLOCK

Buffered Cocopeat Block

Premium washed & calcium-buffered cocopeat. Available in 8mm and 15mm cut fiber — 40% fibre and 60% Cocopeat. Expands to > 16 L/kg with excellent structure for root growth. Calcium-buffered to significantly reduce Na, K and Cl salt levels. Ideal for greenhouse cultivation, hydroponics and potting mixes.

PH 5.5 – 6.5	EC < 0.5 mS/cm	EXPANSION > 16 L/kg
CUT FIBER 8mm and 15mm	MOISTURE 15 – 18%	ORGANIC MATTER > 85%

- Green House Cultivation
- Hydroponics
- Seed Germination
- Potting Mixes
- Nursery Substrates
- Reduced Na · K · Cl

ULTRA-LOW SALINITY GRADE

Low EC Cocopeat

Specifically engineered for sensitive crops and precision hydroponics. Multiple fresh-water rinses achieve the lowest possible soluble salt levels. Ideal for seed raising and crops intolerant to salinity.

PH 5.5 – 6.5	EC < 0.5 mS/cm	EXPANSION > 16 L/kg
CUT FIBER 8mm and 15mm	MOISTURE 15 – 18%	COMPOSITION 40% Fibre + 60% Cocopeat

- Seed Raising
- Precision Hydroponics
- Sensitive Crops
- Propagation
- Substrate Blending

Trusted by Growers World Wide

QUALITY CERTIFIED

Every batch lab-tested with full COA for pH, EC and physical parameters.

GLOBAL EXPORT

Export-grade packaging. 26+ MT per 40ft HQ container to major ports worldwide.

CUSTOM PACKAGING

4.5–5.5 kg blocks, 200L bags and grow-bag fillings. Private labeling available.

RELIABLE SUPPLY

Year-round production from Karnataka's coconut belt for long-term partnerships.

CUSTOMIZABLE EC & PH

Fully customizable EC and pH to match your specific growing program requirements.

SCIENTIFIC PROCESSING

Multi-stage washing and calcium buffering — pathogen-free, weed-free substrate.

WHAT OUR CLIENTS SAY

"Peatman's buffered cocopeat has proven to be very good for green house operations. The consistent quality and reliable supply have made us a preferred substrate supplier."

Dr. Babulal Agrawal
Professional Grower & Substrate Specialist · India

"Finding a supplier with consistently low EC cocopeat was challenging until we partnered with Peatman. Their ultra-low salinity grade is perfect for our hydroponic lettuce production."

Maria Fernandez
Head of Procurement, HydroGrow Ltd. · Spain
